About This Game

Serious Sam 3 VR: BFE is a virtual reality action shooter, a glorious throwback to the golden age of first-person shooters where men were men, cover was for amateurs and pulling the trigger made things go boom.

Serving as a prequel to the original indie and Game of the Year sensation, Serious Sam: The First Encounter, Serious Sam 3 VR: BFE takes place during the Earth's final struggle against Mental's invading legions of beasts and mercenaries.

Key Features

- Now available in glorious VR! - "basically the same game but the devs just ticked a magical checkbox for VR"
- Serious Sam Fusion 2017 integration - play cross-platform with players of the pancake version to find out what's the ultimate combo: hi-tech motion controllers or good old keyboard & mouse

- Dual-wield the Destructive Arsenal – A scoped assault rifle or a double-barreled shotgun? Automatic shotgun or the punishing minigun? Why not use both!? Unleash the almighty barrage of flaming cannonballs!
- Frantic Arcade-Style Action – Hold down the trigger and lay waste to a never-ending onslaught of attackers or face being overrun by Mental's savage beasts. No cover systems, no camping – it's just you against them. All of them!

Same Game just in VR, perfect. I was a bit concernd if i get motion sickness while gameplay is really fast and i like locomotion. But i could get used to it quite quick and experience it just a little bit while palying 2-3 hours in a row.

Graphics a great, sound too and gameplay yeah ...running backwards holding one gun forward the other backwards, thats weird and funny :D. Pretty good in VR!. This makes a joke of games that were "Made from VR from the ground up". It turns out the best VR game out there is a conversion. It works very well and (unlike made for VR games) is full length.

Having 2 weapons in hand feels awesome but makes it a bit easier. Even 2 pistols do a lot of damage. No problem though, just increase the difficulty level a bit.

I was using dash teleport and there were occasional comprmises such as no jetpack to fight the final boss. I haven't tried locomation yet to see if it reappears but even if it doesn't don't let that put your off. This is what VR is all about.. 30 yo software dev here. last played serious sam in my teens. Last night i punched my girlfriend in the face trying to sledgehammer an AAAHHHH suicide bomber. She will be out of the house by noon so more play area for 2 handed badassery.

15V10 would punch her again. buy it!. Arena style chaos and mayhem... its a fast paced, run and gun brawl that I did not find fun in the least.. It's discount Doom with snarky commentary :)

I got this on sale as part of a bundle package, and among all of the Serious Sam VR options, this one is the best looking. It's not the most engaging story, but who cares? There's no shortage of monsters to mow down nor weapons with which to do so. Playing on "normal" difficulty nets you a reasonably fun romp through various environments with an assortment of shooting galleries.

If it's on sale, it's worth a buy, a good time-killer for some seated play while taking a break from playing Skyrim VR standing for hours at a time.
